ABOUT US

Dayananda Sagar Business School is one of the most preferred Business Schools in India. Being in the heart of the city, the Institute is acclaimed as one of the best Business schools, providing quality management education through its PGDM program (AICTE approved). It is known for its reputation in the corporate world for having a strong focus on preparing “industry-ready” graduates.

The curriculum is Industry-Oriented and designed by both Academicians and Industry Experts, coupled with new-age teaching pedagogies and assessments. It is unique not only in its contents but also in its delivery. The aim is to offer the nation a vision driven leaders who are competent to meet the challenges of a future world.

ABOUT THE CONFERENCE:

VIMARSHA-2025: International Conference on AI, Humanity and Sustainable Business, in association with the Humanistic Management Network (HMN), aims to foster a global dialogue on the convergence of artificial intelligence, ethical leadership, and sustainable business practices. In an age where AI is reshaping industries and redefining the future of work, this conference invites participants to explore how emerging technologies can be aligned with humanistic values, ensuring innovation not only drives efficiency but also promotes dignity, fairness, and social well-being. The conference will bring together academicians, researchers, corporate professionals, and thought leaders to share insights on creating inclusive, ethical, and environmentally responsible business models. With a focus on AI ethics, responsible innovation, human-centered leadership, and the UN Sustainable Development Goals, VIMARSHA-2025 offers a platform for critical reflection and meaningful collaboration. It envisions a future where technology serves humanity, and businesses thrive by embracing purpose, compassion, and sustainability at their core.

SUB THEMES:

Track 1: AI-Driven Innovation in Production, Operations, Logistics & Entrepreneurship

Sub-themes:

1. Smart manufacturing and Industry 4.0
2. AI in logistics and supply chain optimization
3. Sustainable operations using intelligent systems
